

# JUNKER'S NURSERY LTD

2014 - 2015

Higher Cobhay  
Milverton  
Somerset  
TA4 1NJ

☎ (01823) 400075

E-mail: [karan@junker.co.uk](mailto:karan@junker.co.uk)

Website: [www.junker.co.uk](http://www.junker.co.uk)

I thought last year's list was exciting, but this year's is even better, with lots of further new additions, plus the re-appearance of some old favourites as our new stock plants establish and provide propagation material. Indeed that is the key to what we do here - we propagate and grow on everything ourselves. We do not buy in, so all our plants are "Home Grown in Somerset".

We remain committed to growing the most exciting plants to the best of our ability, and to giving you, the customer, the kind of personal service that seems to have almost disappeared from society these days. I make no bones about emphasizing this. We propagate from our own stock plants, and grow on, everything that we sell. We do not buy in to re-sell. It is our belief that too many plants are imported, with inherent establishment, pest and environmental concerns. I urge you to "Buy British"! The intention with this list is that it is easier for you to print off (either completely or specific sections) allowing you to make notes of personal interest as you either walk round the nursery here, or research the plants at home. An increasing number of folk have access to the internet, so I encourage you to use this catalogue in conjunction with our website

**[www.junker.co.uk](http://www.junker.co.uk)**

where full descriptions of most can be found. I'm trying to bring the website up to date to reflect this new season's catalogue and to add descriptions of newly available items, but there are never enough hours in the day...

We're doing things a little differently here: we are growing an increasing amount of our stock in the open ground, to be lifted, root-balled and wrapped (not to be confused with "bare-root" which is never as satisfactory.) There are numerous advantages to this apparently "old-fashioned" method, not least of which is the production of hardier, more robust plants. They have an established natural root system, and are used to growing outside in the real world. Thus they are better acclimatised and will be far more tolerant of the extremes of weather we seem to be experiencing than soft plants pushed on in artificial conditions. We believe that the use of peat-based composts and plastic pots is not sustainable and us such, all our younger container plants are now grown in certified peat-free media.

Typically we start lifting in early November, dependant on the weather. The plants don't need to have completely lost their leaves, but they do need to have finished active growth for the season. We will then continue lifting right through until March or so, but late planting can be risky in the event of a dry spring. Lifting is weather dependant though, as we can't continue if everything is waterlogged or frozen solid. I would encourage you therefore to make your plans and reserve your plants for when we can lift them. We are blessed with wonderful soil here, and magnificent views, so we are very exposed. Our plants will be hardy, that's for sure!

The following listing is intended to include all plants that will be available over the next season. Inevitably there will be things I've missed, and others will sell out since we only sell plants which we grow ourselves. So do please email me your list prior to ordering. In many cases there will be multiple sizes available. Our new site allows us to offer much larger specimens in addition to our normal range, including semi-mature maples that need to be seen to be believed! We will be developing collections of a number of further genera which will beautifully complement our existing range. In time, examples of all our mother plants will be displayed in a natural setting, allowing full and meaningful comparison between cultivars to be made. This will not only look awesome, it will also be incredibly useful. The first phase of this is our Woodland Quarry. We have planted most of the structure in the top section of that now and already it's looking fantastic. It was incredibly difficult to choose our favourite plants for inclusion, but we've worked hard to achieve year round interest in there. I've noted some of these against the catalogue listing in the coming pages. You're welcome to come and have a look and join us in watching it develop. Torsten has put so much effort into reprofiling the old quarry – it's really his project.

Our delivery service becomes increasingly relevant with our larger plants —most areas are accessible with patience. Please ask. Visitors remain welcome by appointment only, so do please ring or email before visiting, to ensure that either myself or my son Torsten will be available to show you the plants.

*Karan Junker*

If you are interested in purchasing any of our plants, drop me through an email with your wish list. Give me an idea of what sort of size plants you would prefer and whether you wish to collect or have them delivered. Remember to include your full postal address including phone number and postcode. I will then reply with price, size and availability detail and we can progress from there.

I have once again produced a simple list rather than a descriptive catalogue. As we increase the number of varieties that we grow, particularly the number of cultivars within a given genus, so the quantity of any one variety decreases. This was making the descriptive catalogue increasingly unwieldy, and with current environmental awareness, I am also mindful of paper usage. Times change and the internet is becoming more ubiquitous. Thus my intention is that this booklet represents a list of plants that are available for Autumn 2014, or will be available over the coming season. Use it in conjunction with the website, which will be updated as often as my time allows, where full descriptions will be found. Helpfully, I have left lots of space on the pages here for you to make your personal notes. I have also indicated plants that were not available last year. We are now growing our plants in an increasing number of different sizes which was also contributing to catalogue complications, as it was simply impossible to list all the options with their prices. In principle

the price is determined by age rather than physical size. Thus the website will show the starting price for the youngest plants. For example, I have Japanese maples in assorted sizes ranging from around £30 up to two thousand pounds, with a myriad steps in between. Something for everyone then, but bear in mind not all cultivars will be available in all sizes all the time. Some plants will sell out, and others may become available. In principle the starting size for most things is a 2 or 3 litre pot at an appropriate price, whilst the older, more mature plants tend to be growing on in the open ground where they can develop naturally, in most cases making a more compact, denser plant than their pot-grown equivalent. This more robust plant will need less staking and protection when planted. As always, if you have any questions, don't hesitate to contact me. Be aware that the new site here is over 3 times the size of our previous holding, so I am not always in range of the phone. Thus email communications are preferable as I can deal with them at unsociable times!
