

JUNKER'S NURSERY

2021 - 2022

Higher Cobhay
Milverton
Somerset
TA4 1NJ

E-mail: karan@junker.co.uk

Website: www.junker.co.uk

Welcome to our stock list for the new season.

We remain committed to growing the most exciting plants to the best of our ability, and to giving you the kind of personal service that seems to have almost disappeared from society these days. I make no apology for emphasizing this. We propagate everything that we sell from our own stock plants, and grow them all on here in Somerset. We do not buy in to re-sell. It is our belief that too many plants are imported, with inherent establishment, pest and environmental concerns. I urge you to "Buy British"!

We are a little different. We believe that the use of peat-based composts and plastic pots is not sustainable, so we grow the majority of our stock in the open ground, to be lifted, root-balled and wrapped (not to be confused with "bare-root" which is rarely as satisfactory.) There are so many advantages to this apparently "old-fashioned" method, not least of which is the production of hardier, more robust plants. They have an established natural root system, and are used to growing outside in all weathers. Thus they are better acclimatized, and will be far more tolerant of the extremes of weather we are having, than soft plants pushed on in artificial conditions. These more robust plants will need less staking and protection when planted; their natural development resulting in a more compact, denser plant than their pot-grown equivalent.

Our availability follows the natural cycle, so typically we start lifting in early December, dependant on the weather and ground conditions. We then continue lifting right through until March or so, but very late planting can be risky in the event of a dry spring. Lifting is weather dependant though, as we can't continue if the ground is waterlogged or frozen solid. I would encourage you therefore to make your plans early and reserve your plants, so we can lift them at short notice when the time is right. We are blessed with magnificent views, so we are very exposed. Our plants will be hardy, that's for sure!

Our new site allows us to offer much larger specimens in addition to our traditional range, including semi-mature maples, magnolia and dogwoods that need to be seen to be believed! We are developing collections of a number of further genera, which will beautifully complement our existing range.

The following listing is intended to include all plants that will be available over the new planting season. As we increase the number of varieties that we grow, particularly the number of cultivars within a given genus, so the quantity of any one variety decreases. I encourage you to use this catalogue in conjunction with our website

www.junker.co.uk

where full descriptions of many can be found. I am aware that the website needs attention, but there are never enough hours in the day and I confess to preferring to work outside...

The increasing number of size options available was also contributing to paper catalogue complications, as it became impossible to list all the options with their prices. In principle the price is determined by age rather than physical size, though clearly older plants will be larger and more substantial than their younger counterparts, within the parameters of the characteristics of the cultivar.

This is our home as well as our work and with a vulnerable family member living here, the nursery has been closed to visitors for the duration of Covid 19. That continues to be the case. It has been a challenging time in many ways and due to circumstances beyond our control, unfortunately we will have a more limited range of varieties and sizes available than usual

www.junker.co.uk

this autumn. None of the youngest size groups will be available, so there will be no smaller open ground plants and a very limited range available in pots.

Nevertheless, we do still need to eat, so we will be selling a limited range of our rootballed plants from the open ground through the early part of the dormant season (ie up until Christmas. We will be assessing how we approach matters in the new year much nearer the time.) We have a wonderful range of special trees and shrubs to offer in a range of older sizes, including some spectacular specimens.

Since we have such an extensive collection, we don't propagate all cultivars every year. Hence we don't have all cultivars available in all sizes every season and as the season develops, things will sell out.

Therefore, I will need to check the actual plants in order to give you accurate size and price details, as well as a photo of the specific individual (weather permitting). In principle we will be offering the following size groups, mainly from the open ground, this year.

- young plants of a very limited range in 3 litre pots at £50 - £85 (dependant on variety)
- this season, there will be very little available from the open ground at less than £500 each.
- there is an extensive range of beautiful older / larger / more mature plants increasing in price incrementally with age and size, from around £599 - £699 - £799 and on up to £999
- for many plants, there are even more spectacular semi-mature specimens, available from around £1099 - £1299 - £1599 - £1999 - £2999 - £3999 - £4999 and so on.
- and then there is a more limited range of the very best, most mature specimens at higher prices, up to over ten thousand pounds.

We simply have too many plants for me to be able to detail every option for every enquiry, so if you could give me an indication of your preferred budget on this basis, that will enable me to personally check the actual plants to give you accurate size and price detail of the most relevant plants for your purpose.

I can only apologise for our temporary lack of availability in the smallest, cheapest sizes in this most challenging of years.

The intention is that it will still be possible for you to collect plants by prior arrangement, in a contact-free manner. Alternatively, delivery shouldn't be a problem when the time comes. We use a number of different delivery methods, dependant on the size and nature of the order. The plant size usually determines the method, whilst the delivery address defines the delivery cost, so do please let me have the relevant postcode if delivery is required. The problems afflicting the haulage industry with driver shortages have been well documented and these may have an affect on the service we can offer this season. Time will tell but fortunately we have an excellent relationship with a local logistics company.

Let me know your further thoughts, preferences and requirements and, as always, I will do my best to help.

We have nearly 50 acres here, so I am rarely in range of the phone. Thus email communications are essential please.

Karan Junker

If you are interested in purchasing any of our plants, drop me through an email with your wish list. Give me an idea of what sort of size plants you would prefer, as well as an indication of your target budget and whether you wish to collect or have them delivered. Remember to include your full postal address including phone number and postcode. I will then reply with price, size and availability detail and we can progress from there.
